New Catalogue 2005 - 2006

BYK-Gardner - manufacturer of innovative measuring instruments for the quality control of paints and plastics - is introducing the new catalogue 2005 - 2006.

Many new, innovative products necessitated the update of the well-known BYK-Gardner catalogue. The new catalogue, too, contains the solution for any task in controlling the quality of paints and plastics:

Of special interest is the new spectro-guide - the color measuring instrument that measures color **and** gloss simultaneously. Even on structured surfaces this instrument is highly reliable. All those requesting a test instrument have the chance to win one out of five MP3-Players.

Now, the choice of byko-chart draw-down charts has become even bigger. There are draw-down charts suitable for any application.

Also the new catalogue contains interesting reports about the positive experiences the customers made in their day-to-day work:

- wave-scan DOI - the appearance standard in the automotive industry
- micro-gloss and spectro-guide - color and gloss control of automotive interior parts
- color-view with sample rotator - measurement of resin pellets
- temp-gard - oven temperature control
- gradient-oven - acid etch test

It is part of BYK-Gardner's philosophy to transfer their employees' knowledge to their customers. The specialists from BYK-Gardner do not only train their customers in the application, but share their extensive knowledge and many tricks, too, in seminars. Furthermore, BYK-Gardner's customers profit from the worldwide calibration and certification services.

The new BYK-Gardner Catalogue 2005 - 2006 is available free of charge from BYK-Gardner GmbH, P.O. Box 970, 82534 Geretsried, Germany. Phone: +49/8171/3493-0; Fax: +49/8171/3493-140; email order@byk-gardner.de or on the Internet at www.bykgardner.com
